

I am an experienced React Native Developer with 6 years of proven experience building performant mobile apps for both iOS and Android. Building a product is a collaborative effort, and I am a strong team player. I have extensive experience of architecting, building and deploying apps, and coordinating with teams.

## WORK EXPERIENCE

*Budapest, Hungary*

*Nilfisk is a leading supplier of professional cleaning equipment in both industrial, commercial and consumer markets.*

### Achievements/Tasks

- I am responsible to develop, test, and maintain Nilfisk My Fleet app which is a fleet management app for Nilfisk's manual and autonomous cleaning machines. It provides sites and machines stats via graphs and numbers, displays cleaning maps, schedules tasks, manages users, and sends push notifications.
- I am also responsible for The Service Tool App for service technicians of the machines. It connects to machines via Bluetooth and helps in troubleshooting errors by fetching machine data, warnings, and can also be used to update machine's firmware.
- I maintain CI/CD pipelines for these two projects by updating provision profiles etc and fixing crashes to ensure smooth app delivery for testing and stores.

Dubai, UAE (Remote from Karachi, Pak,

eZhire is an app which allows to rent a car without any hassle or paperwork in MENA region, Europe and Pakistan

### Achievements/Tasks

- I worked at MeStar Inc, a subsidiary of eZhire, as a React Native Developer to develop an AI-based life coaching app. Key features of the app includes social sign-in, in-app purchases, an AI-based chatbot with audio messaging, an audio/video player, scheduling meeting with consultants, push notifications, and more.

## Karachi, Pakistan

*Digitonics is an IT solutions and services consulting company providing services to early stage ventures and businesses.*

### Achievements/Tasks

- During my tenure at Digitonics, I worked on two interesting projects with different teams. I worked on developed a simple Patient Wait App which lists the nearest urgent care and emergency departments in the US based on their wait time.
- I also worked on developing UI for Venkat App, an online bookstore.

## Karachi, Pakistan

*KalSoft is a Microsoft Gold Certified Partner and a leading technology solutions and services consulting company with offices in Canada, KSA, UAE and Pakistan.*

### Achievements/Tasks

- During my tenure at Kalsoft, I also worked on a social networking app and the MVP of a multilingual food ordering app using React Native. I also had an opportunity to develop few new features on a Native iOS Employee Management App for Jazz - Pakistan's largest telecom company.

## SKILLS

React Native   Redux   RTK Query   Zustand

Unit Testing (Jest)   Typescript   JavaScript   DevOps

CI/CD Pipelines   ReactJS   Swift   NodeJS

Java   ExpressJS   C++

Database: SQL, Firebase & MongoDB

## APPS / PROJECTS

## Nilfisk My Fleet

- iOS: <https://apps.apple.com/us/app/nilfisk-my-fleet/id1437373569>
- Android: <https://play.google.com/store/apps/details?id=com.nilfisk.siteassist>

## Leet Carbon (side project)

- LEET Carbon connects trees and forests with their owners for better protection, restoration, and conservation through individual and public engagement and social nature networking.
- App video: <https://www.youtube.com/watch?v=1QaTLn0df-0> 
- App promo: <https://www.youtube.com/watch?v=uasR246l27c> 
- *Note: The app was deployed but later unpublished due to a change in business direction.*

## EDUCATION

## Bachelors of Software Engineering

Mohammad Ali Jinnah University, Karachi

07/2015 - 06/2019

CGPA: 2.90

## CERTIFICATES / BOOKS

## Node.js, Express, MongoDB &amp; More: The Complete Bootcamp

42 hours course on Udemy.com

# React Native - The Practical Guide

16.5 Hours course on Udemy.com

## The Complete JavaScript Course 2019

28 Hours course on Udemy.com

# The Ultimate Guide to React Native Optimization

*I read this book released by Callstack and it focuses mainly on improving component performance and ultimately the app.*

## PLATFORMS / TOOLS

A collection of rounded rectangular buttons, each containing the name of a tool or service. The buttons are arranged in three rows: the first row has 'XCode', 'Android Studio', and 'Postman / Swagger'; the second row has 'Azure DevOps', 'Git', 'Figma / Adobe XD', and 'Jira'; the third row has 'Docker', 'Firebase App Distribution', and 'Expo'.

XCode	Android Studio	Postman / Swagger	
Azure DevOps	Git	Figma / Adobe XD	Jira
Docker	Firebase App Distribution	Expo
