## WORK EXPERIENCE

### Mobile App Developer

#### Nilfisk

07/2022 - Present

Budapest, Hungary

Nilfisk is a leading supplier of professional cleaning equipment in both industrial, commercial and consumer markets.

#### Achievements/Tasks

- I am responsible to develop, test, and maintain MyFleet and the Service Tool App using React Native. MyFleet provides site/machine stats via graphs and numbers, displays cleaning maps, schedules tasks, manages users, and sends push notifications. The Service Tool App connects to machines via Bluetooth to fetch information, warnings, and upload firmware.

### Software Engineer

#### eZhire

02/2021 - 06/2022

Dubai, UAE

eZhire is an app which allows to rent a car without any hassle or paperwork in MENA region, Europe and Pakistan

#### Achievements/Tasks

- I worked at MeStar Inc, a subsidiary of eZhire, as a React Native Developer to develop an AI-based life coaching app. The main tech stack included React Native and Redux. Key features of the app include social sign-in, in-app purchases, an AI-based chatbot with audio messaging, an audio/video player, meeting scheduling with consultants, push notifications, and more.

### React Native Developer

#### Digitonics Labs

09/2020 - 01/2021

Karachi, Pakistan

Digitonics is an IT solutions and services consulting company providing services to early stage ventures and businesses.

#### Achievements/Tasks

- During my tenure at Digitonics, I worked on some interesting projects with various team members. I worked on developed a simple Patient Wait App which lists the nearest urgent care and emergency departments in the US and worked on developing UI for Venkat App, an online bookstore.

### Jr. React Native Developer

#### KalSoft Limited

10/2019 - 08/2020

Karachi, Pakistan

KalSoft is a Microsoft Gold Certified Partner and a leading technology solutions and services consulting company with offices in Canada, KSA, UAE and Pakistan.

#### Achievements/Tasks

- During my tenure at Kalsoft, I also worked on a social networking app and the MVP of a multilingual food ordering app using React Native. I also had an opportunity to develop few new features on a Native iOS Employee Management App for Jazz - Pakistan's largest telecom company.
