Dear Hiring Manager

As a mobile app enthusiast, I am excited to apply for the Senior React Native Developer position. I have over 6 years of proven experience of building performant mobile apps for both iOS and Android platforms using React Native. I have worked on over 15 Apps and have deployed multiple apps on stores. I hold a bachelor's degree in software engineering.

At my current role at Nilfisk, I am responsible to develop, test, and maintain My Fleet app which is a fleet management app for manual and autonomous cleaning machines. I am also responsible for The Service Tool App for service technicians of the machines. It connects to machines via Bluetooth and helps in troubleshooting errors by fetching machine data, warnings, and can also be used to update machine's firmware. I also maintain CI/CD pipelines for these two projects by updating provision profiles etc. and fixing pipeline crashes to ensure smooth app delivery for testing and to stores.

Throughout my professional career, I have worked on multiple application which ranges from social media apps to e-commerce, food delivery, online marketplace and other utility apps. I can make pixel-perfect UI across both mobile platforms which runs smoothly on tablets & iPads as well. I have worked on apps with trending mobile app features such as:

- localization/internationalization
- cloud notifications
- chat
- in-app purchases / payment integration
- google maps/map box integration
- ads integration.

I have a firm grasp of the Typescript, JavaScript language and its nuances, including ES6+ syntax. I am highly proficient in writing optimized and performant components, version control systems, third-party library integration, Jira, Slack, Azure DevOps & also familiar with native build tools, like Xcode, and Gradle. I published a npm library for multi-slider and have hands-on experience with CI/CD pipelines.

These are a few of my accomplishments and qualities:
- I have strong problem-solving and analytical skills and am highly motivated to tackle complex challenges.
- I have experience of developing over 15 apps and have successfully deployed more than 8 applications to stores.
- I can work independently on any sort of React Native app.
- I am highly proficient in developing pixel-perfect UI and have good knowledge of UI/UX.
- I am experienced with third-party library integration &services like Firebase, one signal.
- I understand the importance of smooth transition and have experience with reanimated library.
- I have experience of working on native iOS apps using Swift.
- I have experience of maintaining CI/CD pipelines

I am looking forward to a better position for my professional growth. Please consider my qualification, experience and expertise for the role of Senior React Native Developer. I will work with my full dedication for the company's growth, and success and would be a valuable addition to the development team. I will be happy to provide any further information or documents if required. I look forward to your positive response. Thank you for your time and consideration.
